

Exam

21 April 2024 20:41

Question 1:

Which one of the following is a data link protocol?

- A) point to point protocol
- B) HDLC
- C) Ethernet
- D) all of these answers

Question 2:

Data communication system within a building or campus is

- A) MAN
- B) LAN
- C) WAN
- D) None of these answers

Question 3:

The transmission data rate is decided by

- A) transport layer
- B) network layer
- C) data link layer
- D) physical layer

Question 4:

The term 'duplex' refers to the ability of the data receiving stations to echo back a confirming message to the sender. In full duplex data transmission, both the sender and the receiver _____

- A) can send or receive data one at a time
- B) can receive and send data simultaneously
- C) can do one way data transmission only
- D) cannot talk at once

Question 5:

The network layer protocol of the internet is

- A) hypertext transfer protocol
- B) internet protocol
- C) Ethernet
- D) none of these answers

Question 6:

CRC stands for

- A) cyclic redundancy check
- B) code redundancy check
- C) code repeat check
- D) cyclic repeat check

Question 7:

Application layer protocol defines

- A) types of messages exchanged
- B) message format, syntax and semantics
- C) rules for when and how processes send and respond to messages
- D) all of these answers

Question 8:

TCP/IP model does not have _____ layer but OSI model has this layer.

- A) presentation layer
- B) application layer
- C) both session layer and presentation layer
- D) session layer

Question 9:

Most packet switches use this principle

- A) None of these answers
- B) Store and forward
- C) Both Stop and wait & Store and forward
- D) Stop and wait

Question 10:

Which of these is not a guided media?

- A) Fiber optical cable
- B) Wireless LAN
- C) Copper wire
- D) Coaxial cable

Question 11:

Coding schemes can be divided into two broad categories _____

- A) Block Coding and Convolution Coding.
- B) Hamming coding and convolution coding
- C) character coding, integer coding
- D) hamming coding and block coding

Question 12:

Which one of the following tasks is not done by the data link layer?

- A) framing
- B) channel coding
- C) flow control
- D) error control

Question 13:

Which one of the following tasks is not done by the data link layer?

- A) framing
- B) channel coding
- C) flow control
- D) error control

Question 14:

Data Link Control Protocol (HDLC) is implemented at the _____

- A) Data link layer
- B) Network layer
- C) transport layer
- D) Physical layer

Question 15:

A distributed network configuration in which all data/information pass through a central computer is

- A) All of these answers
- B) star network
- C) bus network
- D) ring network

Question 16:

osi stands for

- A) none of these answers
- B) operating system interface
- C) open system interconnection
- D) optical service implementation

Question 17:

A _____ is a device that forwards packets between networks by processing the routing information included in the packet.

- A) firewall
- B) all of these answers
- C) router
- D) bridge

Question 18:

In OSI network archti, the dialogue control and token management are responsibilities of?

- A) session layer
- B) network layer
- C) data link layer
- D) transport layer

Question 19:

The physical layer translates logical communication requests from the _____ into hardware-specific operations.

- A) network layer
- B) transport layer
- C) data link layer
- D) application layer

Question 20:

Tcp/ip model was developed _____ the OSI model.

- A) none of these answers
- B) prior to
- C) simultaneous to
- D) after

Question 21:

Which transmission media has the highest transmission speed in a network?

- A) electrical cable
- B) optical fiber
- C) coaxial cable
- D) twisted pair cable

Question 22:

HTTP refers to?

- A) None of these answers
- B) Hyper Text Transmission Protocol
- C) Hyper Text Transfer Protocol
- D) Hyper Text Tie Protocol

Question 23:

Communication circuits that transmit data in both directions but not at the same time are operating in

- A) a simplex mode
- B) a half-duplex mode
- C) an asynchronous mode
- D) a full-duplex mode

Question 24:

In the IEEE standards, 802.5 standards is also called?

- A) Token Ring
- B) Ethernet
- C) Wireless Token Area Network
- D) Token Bus

Question 25:

Each IP address can identify the _____ or _____ of IP packets.

- A) source, length
- B) source, destination
- C) length, size
- D) Size, destination

The Uniform Resource Locator (URL), is a standard for specifying any kind of information on the

- 1. server-end
- 2. client-end
- 3. webpage
- 4. internet

MCQ 22: The World Wide Web (WWW), was originally designed as a

- 1. stateless document
- 2. stateless program
- 3. stateless entity
- 4. stateless ip

MCQ 23: The webpages are stored at the

- 1. server
- 2. client
- 3. domain
- 4. mail server

MCQ 24: The Uniform Resource Locator (URL), defines four things: protocol, host computer, port and

- 1. path
- 2. page
- 3. program
- 4. access

MCQ 25: The Hypertext Transfer Protocol (HTTP) uses the services of Transmission Control Protocol (TCP) on

- 1. well-known port 80
- 2. well-known port 81
- 3. well-known port 82
- 4. well-known port 83

MCQ 16: In World Wide Web (WWW), an electronic store (e-commerce) can use a cookie for its

1. client shopper
2. server usage
3. server data
4. client data

MCQ 17: Which one of the following languages is used for creating Web pages?

1. HTTP
2. HTML
3. Dotnet
4. C++

MCQ 18: In Hyper Text Transfer Protocol (HTTP), a client can directly connect to a server using

1. web-based connection
2. domain
3. telnet
4. linear connection

MCQ 19: HTML stands for

1. Hypertext Markup Locator
2. Hypertext Markup Language
3. Hypertext Mixed Language
4. Hypertext Markup Lines

MCQ 20: A Web page is made up of two parts

1. header and footer
2. text and number
3. document and body
4. head and body

The documents that are created and stored in a server as a fixed content are called

1. static documents
2. stateless document
3. active documents
4. dynamic documents

MCQ 12: In hypertext transaction, the formats of the request and response messages are

1. different
2. similar
3. constant
4. active

MCQ 13: In hypertext transaction, the term CONNECT is used for

1. connection generation
2. reserved connection
3. connection termination
4. active connection

MCQ 14: In World Wide Web (WWW) and HyperText Transfer Protocol (HTTP), a technology that creates and handles dynamic documents is called

1. common gateway interface
2. common gateway integrate
3. common gateway ip
4. common gateway internet

MCQ 15: A program or a script to be run at the client site are called

1. web documents
2. hyperLink documents
3. static documents
4. active documents

The proxy server reduces the load on the

1. proxy server
2. node server
3. domain server
4. original server

MCQ 32: A proxy server keeps copies of responses to

1. current requests
2. recent requests
3. pending requests
4. received requests

MCQ 33: When a client sends a request to a server, the browser looks for it in the

1. addresses
2. cookie directory
3. active directory
4. host directory

MCQ 34: In architecture, to improve efficiency, servers normally store requested files in a cache in

1. server
2. domain
3. webserver
4. memory

MCQ 35: HTTP uses the services of TCP on well-known port

1. 80
2. 1022
3. 404
4. 505
